

# Lepto-5

## Indications:

For use in healthy cattle and swine as an aid in the prevention of leptospirosis caused by *Leptospira canicola*, *grippotyphosa*, *hardjo*, *icterohaemorrhagiae*, and *pomona bacterin*.

## Approved For Use On:

Cattle and Swine

## Product Advantages:

- One dose in cattle reduces labor and stress on animals.
- Safe for use in pregnant animals without concern of abortions.
- Meets or exceeds all USDA standards for potency, purity, and safety

## Dosage and Administration:

SHAKE WELL before use. Do not vaccinate within 21 days before slaughter. Inject 2 mL intramuscularly or subcutaneously. For swine, a second dose should be administered 2-4 weeks later. Annual single dose re-vaccination is recommended for both species.
