

ACTIVATED CHARCOAL GEL

With Electrolytes

DESCRIPTION:

Activated Charcoal Gel is designed for use as an emergency first aid for accidental poisoning resulting from grain overload, insecticides, herbicides, bacterial contaminants or mycotoxins. Research has shown that activated charcoal is effective in counteracting the effects of certain toxins.

FOR USE ON:

Cattle, Horses, Sheep, Goats, and Cats

BENEFITS:

- Multi-Species label
- Contains Electrolytes

INGREDIENTS:

Water, Activated Hardwood Charcoal (100mg/mL), Attapulgitte Clay (200 mg/mL), Sodium Chloride (35 mg/mL), Potassium Chloride (35 mg/mL) and Polysorbate.

DOSAGE and ADMINISTRATION:

Adult Cattle and Horses: It is recommended to give one full tube (300mL)

Sheep and Goats: 1-3 mL per kilogram (2.2 lbs) body weight

Dogs and Cats: 1-3 mL per pound body weight

Place tube in proper dosing gun and remove the cap. Hold the animal's head in a slightly elevated position and place the nozzle on the back of the tongue. Discharge by pulling back on the trigger of the gel gun.

Repeat dosage after 1 to 3 hours or as needed. A stomach tube should be used in animals which are unable to swallow.

PACKAGING:

80 mL tube, 12 tubes per case

UPC # 7 45801 11625 2

300 mL tube, 12 tubes per case

UPC # 7 45801 11629 0
