### Indications

Aspiriflex gel is indicated for use in dogs for temporary relief of arthritis pain, or inflammation. Aspiriflex has anti-inflammatory, antipyretic (fever reducing) and analgesic (pain reducing) properties.

### For Use On

Dogs of all sizes (DO NOT USE ON CATS)

### Features and Benefits

- Very effective in reducing arthritic signs, proven in clinical trials\*
- Tested safe for use, even in very old dogs
- Precise dosage - extensive clinical trials to determine aspirin's most effective dose for pain.
- Contains the most potent OTC drug that dealers are allowed to sell
- Even the most severe arthritic dogs showed improvement within 3 days
- Palatable - all natural liver flavor gel
- Economical alternative to prescription and OTC products
- Easy to administer oral dial-a-dose syringe

\* In clinical trials, 100% of arthritic dogs were noted to have had a positive response to treatment with Aspiriflex.

### Guaranteed Analysis

Each one-half cc contains 250mg of aspirin.

OTHER INGREDIENTS: Soybean oil, salmon oil, aspirin, silicon dioxide, natural liver flavor.

### Directions for Use

Give one-half cc per 25 lb. body weight as needed but no more than twice daily. Place on back of the tongue or offer free choice.

### Packaging

30cc dial-a-dose syringe, 6 syringes per display box
