

Controlled Iodine Spray

Antiseptic / Disinfectant

Indications:

For use in cattle, horses, swine and sheep as a topical antiseptic for use prior to surgical procedures such as castrating and docking; for ringworm and foot rot; for application to the navel of newborn animals; and for minor cuts, teat sores, bruises and abrasions.

Approved For Use On:

Cattle, Horses, Swine and Sheep

Benefits:

- **Effective** - kills bacteria, fungi, viruses, and Protozoa on contact
- **Convenient** - easy-to-use adjustable nozzle delivers either stream or spray
- **Economical** - costs only about half as much as aerosols
- **Safety** afforded by non-irritating property of antiseptic

Active Ingredients:

Polyethoxylated nonylphenol iodine complex
(provides 1.0% titratable iodine).....5.0%

Inactive Ingredients.....95.0%
Purified Water and Nonionic Surfactant.

Directions for Use:

Remove spray cap from 16 oz. container and refill from gallon container. Replace spray cap tightly. Hold container approximately 4 to 6 inches from the area to be sprayed. Point valve at the area to be sprayed. Pull trigger of valve and spray area once lightly. May be repeated daily, if necessary, until the area is healed.
