

SandRID™

Psyllium Pellets

*Natural Psyllium Pellets with
Apple and Molasses Flavorings*

**Equine
Digestive
Care**

Description

SandRID™ is an apple and molasses flavored 100% psyllium pellet with high swell volume to help encapsulate and remove sand and dirt from the intestinal tract. It supports healthy gut function to help reduce the possibility of sand colic. Best fed one week per month as a purge to remove dirt and sand from the gut in volume. This bulk forming fiber laxative of psyllium hydrophilic mucilloid should be part of your regular equine preventative care program.

Features & Benefits

- May help reduce the possibility of sand colic
- Psyllium will encapsulate sand and dirt to help in removal
- Horses love the apple flavor
- Pelleted and easy to feed as a top dress or fed alone

How Does It Work?

By swelling after absorbing water, psyllium increases bulk in the intestinal tract and is believed to induce peristalsis and increase mobility in the intestinal tract. In the treatment of sand colic in horses, psyllium is thought to help collect sand and to help lubricate its passage through the intestinal tract.

Other Uses

- For constipation resulting from too little fiber in the diet
- To increase stool consistency in situations with watery diarrhea

Active Ingredients

Psyllium seed husk.....140,000 mg (per 5.2 oz)

Directions for Use

ADULT HORSE (1,000lbs.): Administer 1 to 1.5 scoops daily for one full week (7 days) out of every month. Give less to ponies, yearlings and foals; more to larger horses and draft breeds. Can be given during or after meal time.

NOTE: Scoop included, equals 5.2 ounces.

Packaging

2.3 lb. pail (7 day purge for 1 horse),
6 per case
UPC#: 7-45801-10719-9

5 lb. pail (2 month supply), 4 per case
UPC#: 7-45801-10720-5

10 lb. pail (4 month supply), 2 per case
UPC#: 7-45801-10721-2

20 lb. pail (8 month supply), 1 per case
UPC#: 7-45801-10722-9

40 lb. pail (16 month supply), 1 per case
UPC#: 7-45801-10723-6
