ShowEase

GEL

Show animals can easily become excited, stressed and full of anxiety with the slightest of change in their environment. Events such as trailering, shoeing, clipping, separation from a pasture mate, change of environment, pressures of a show can take your animal from wonderful to full of tension and undesirable behaviors. How can you help keep your animal relaxed and focused? By helping them process or handle the stressors versus turning to fight or flight mode!

So what's in ShowEase that supports the animal's ability to manage stress in a positive way?

This all natural gel contains L-Theanine, a unique amino acid commonly found in green tea, along with Colostrum Tranquility Peptide Complex™. ShowEase Gel contains 100% pure and concentrated L-Theanine, patented as Suntheanine®.

How does Suntheanine® work?

Suntheanine® is absorbed and transported directly into the brain where it stimulates the generation of alpha brain waves. Alpha waves signify an awake, relaxed state to help the body achieve an alert but relaxed physical and mental balance. Suntheanine® is sold in the US as a dietary supplement, and is classified by the FDA as a generally recognized as safe (GRAS) ingredient.

Suntheanine® Patents & Structure/Function Claims:

Taiyo Kagaku Co., Ltd., Japan has been awarded several manufacturing and use patents for Suntheanine®. The patents cover several applications which include reducing anxiety, suppressing behavior problems of pets, reducing PMS symptoms, promoting relaxation, etc.

In addition, several structure/function claims have been approved by the Food and Drug Administration which include:

- Reduces stress
- Promotes relaxation without drowsiness
- Eases nervousness due to common every day overwork and fatigue
- Reduces nervous irritability

ShowEase Gel does not make use of any herbal ingredients or L-Tryptophan and is free of tested herbals like Kava Kava, Chamomile, or Valerian. ShowEase Gel is all natural and contains only test-free ingredients. However we always recommend you check with your individual association for clearance on any product you are giving your animal.
