# **DO-IT-YOURSELF** VACCINATION GUIDE

Each single-dose bag of Canine Spectra vaccine contains a syringe & two vials - one with liquid contents & one with freeze-dried contents. Use immediately after mixing as shown below.

### **Step One**

Insert needle directly through the cap of liquid vial. Withdraw contents into syringe.

#### **Step Two**

# **Step Three**

Withdraw entire vaccine mixture (1 mL) into syringe. Remove air by gently pushing plunger until vaccine just begins to flow from needle.

#### **Step Four**

Recommended vaccination site is the loose skin at back of neck and shoulder. Gently grasp and elevate a fold of loose skin. Insert needle into soft tissue directly under skin and inject entire contents of syringe.

**Questions?** Call our help line 1-800-821-5570 8 am-5 pm CST

Contains four strains of LEPTO

Comprehensive booster **Offering 10-way protection** CORONA and LEPTO protection
