Super Zin-Cop Footbath with Stabitol Technology

Hoof 1-2-3 is safe and effective for complete treatment of bacterial and fungal hoof problems. Rotation of active treatment ingredients is important to prevent resistance and build up of bacteria and fungi in the hoof. The 3-Phases of Hoof 1-2-3, copper, zinc and the combination of copper and zinc, address the need for rotation to prevent and treat a number of hoof disease problems.

Phase 3, copper/zinc combo is a true formulation that offers a completely water soluble complex to provide dual therapy for the most resistant bacteria/fungi causing hoof maladies. This concentrated formula has the unique Activation Technology that allows for quick absorption of zinc and copper into the hoof area controlling bacteria and fungi.

Foot Bath Solution Mix Rates:

Hoof 1-2-3 Amount	Gallons of Water	Final Solution
8 oz.	31.25	31.31 gallons
1 pint	62.5	62.626 gallons
1 quart	125	125.25 gallons
1 gallon	500	501 gallons
