

Hoof 1-2-3 is safe & effective for complete treatment of bacterial & fungal hoof problems.

Bacteria and fungi can cause a number of hoof maladies affecting the health

of your livestock. There are many choices for prevention and treatment. However, Hoof 1-2-3 is the *first of its kind*, 3-phase rotational system for optimal protection and treatment.

The 3-phases address the need for rotation, in order to keep bacteria and fungi from developing resistance. Best of all, Hoof 1-2-3 is easy to use, effective, and cost effective.

Hoof 1-2-3

A product of the Pond₂O Family

All products available in the following sizes:
4x1 gal, 30 gal, 55 gal Drums

One convenient rate for all phases of prevention!

Foot Bath Solution Mix Rates:

Hoof 1-2-3 Amount	Gallons of Water	Final Solution
8 oz.	31.25	31.31 gallons
1 pint	62.5	62.626 gallons
1 quart	125	125.25 gallons
1 gallon	500	501 gallons

Hoof 1-2-3

A product of the Pond₂O Family

A 3-Phase Rotation for Optimal Hoof Health

- **Formaldehyde Free**
- **Eco-Aqua Safe**
- **Bacterial Treatment of Hoof Rot in All Hoofed Animals**

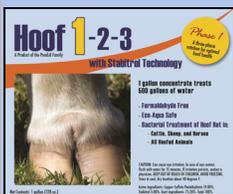

Hoof 1-2-3

A product of the Pond₂O Family

Phase 1

Copper-Sol Footbath

Phase 1 includes Stabitol, which is unique in its ability to keep copper in suspension for an extended period of

time. This allows for more consistent penetration of the hoof and direct contact with bacteria and fungi. Whereas granular copper rapidly loses its effectiveness once in water.

Hoof 1-2-3 Phase 1 offers a variety of benefits:

- Longer duration of activity
- Less cost to the producer
- Increased production from the animal
- Less risk of further hoof infection to the rest of the herd
- Dye component to visually check for animal treatment

Phase 2

Zinc-Sol Footbath

Phase 2 with Zinc (13%), is a formulation that offers a completely water-soluble zinc complex. This

concentrated zinc formula combines the effects of zinc and utilizes the latest technology that allows for quick absorption of zinc into the hoof area controlling bacteria and fungi. This formula has a clear-tan pigment.

Hoof 1-2-3 Phase 2 offers a variety of benefits:

- Option to rotate away from copper compounds and formaldehyde
- Safe for all livestock
- Liquid zinc to stay in suspension for extended period of time
- Stabitol technology to improve absorption into hoof wall

Phase 3

Super Zin-Cop[®]

Phase 3 is a formulation that offers a complete water soluble Zinc (13%) complex in combination with a

19.80% Copper pentahydrate to provide a formidable dual therapy for the most resistant bacteria/fungi causing hoof maladies. It utilizes the latest in water based absorption technology (Stabitol) into the hoof area controlling bacteria and fungi. Blue color solution.

Hoof 1-2-3 Phase 3 offers a variety of benefits:

- Zinc + Copper Combo
- For Severe Hoof Problems
- Formaldehyde free
- Safe for cattle and horses
- Specially designed to protect against RESISTANCE.
