

Hoof 1-2-3

3-Phases for Optimal Hoof Health

BACTERIAL TREATMENT OF HOOF ROT • ECO-AQUA SAFE • FORMALDEHYDE FREE

Hoof 1-2-3 is a safe and effective treatment for hoof maladies caused by bacteria and fungi. The first of its kind — Hoof 1-2-3 is a 3-phase rotational system offering optimal protection. This 3-phase regimen addresses the need for treatment rotation, which helps keep bacteria and fungi from developing resistance. Best of all, Hoof 1-2-3 is easy to use and cost effective.

Save 50% or more: Average commodity hoof bath \$20-\$25. Average Hoof 1-2-3 bath \$5-\$10

PHASE 1

Copper-Sol Footbath

Phase 1 includes NanoTech, which is unique in its ability to keep copper in suspension for extended periods of time. This allows for more consistent penetration of the hoof and direct contact with bacteria and fungi. Whereas granular copper rapidly loses its effectiveness once in water.

Hoof 1-2-3 PHASE 1 offers these benefits:

- Longer duration of activity
- Less cost to the producer
- Increased production from the animal
- Less risk of further hoof infection to the rest of the herd
- Dye component to visually check for treatment on the animal

PHASE 2

Zinc-Sol Footbath

Phase 2 with Zinc (13%), is a formulation that offers a completely water-soluble zinc complex. This concentrated zinc formula combines the effects of zinc and utilizes the latest technology that allows for quick absorption of zinc into the hoof area controlling bacteria and fungi. This formula has a clear-tan pigment.

Hoof 1-2-3 PHASE 2 offers these benefits:

- Option to rotate away from copper compounds and formaldehyde
- Safe for all livestock
- Liquid zinc to stay in suspension for extended period of time
- NanoTech technology to improve

PHASE 3

Super-Zin Cop®

Phase 3 offers a complete water-soluble Zinc (13%) complex in combination with a 19.80% Copper pentahydrate to provide a formidable dual therapy for the most resistant bacteria and fungi. It utilizes the latest water based absorption technology (NanoTech) helping penetrate into the hoof area. Blue color solution.

Hoof 1-2-3 PHASE 3 offers these benefits:

- Zinc + Copper combination for severe hoof problems
- Formaldehyde free
- Safe for cattle and horses
- Specifically designed to protect against resistance to treatment

GALLON SIZE SHOWN • ALSO AVAILABLE IN BULK 15, 30 AND 55 GALLON DRUMS
