# THE RALCO® TECHNOLOGY DIFFERENCE

**Patented Microfused® Essential Oils** have smaller, more uniform droplets that stay stable over time and with temperature changes. Protected droplets get where they are needed to facilitate and maintain intimate contact.

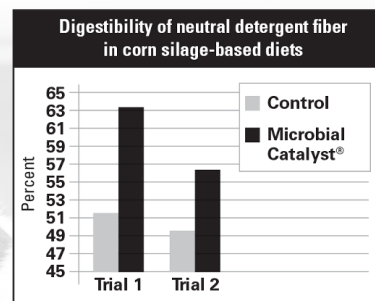

**Competitor Oil:**  
Larger oil droplets in competitive oil products coalesce and become unstable

**Microfused® Essential Oils:**  
20 times greater surface area; 100 drops per 1 drop of competitor

**Patented Microbial Catalyst®** stimulates bacteria that break down fiber and provide more energy for production.
