THE RALCO® TECHNOLOGY DIFFERENCE

Patented Microfused® Essential Oils have smaller, more uniform droplets that stay stable over time and with temperature changes. Protected droplets get where they are needed to facilitate and maintain intimate contact.

Competitor Oil:
Larger oil droplets in competitive oil products coalesce and become unstable

Microfused® Essential Oils:
20 times greater surface area; 100 drops per 1 drop of competitor

Patented Microbial Catalyst® stimulates bacteria that break down fiber and provide more energy for production.

R06-02-B Research conducted by West Virginia University
