

NEW

INSECTICIDE DELIVERY SYSTEM

THE PRECISION INSECTICIDE DELIVERY SYSTEM FOR CATTLE.

The new VetGun III is the next generation in remote insecticide delivery.

- *Lighter and more compact.*
- *Military grade robust materials.*
- *Foregrip rail provision.*
- *Future technology enabled.*

Easy and effective HORN FLY Control & Resistance Management

Nothing works like VetGun™ for horn fly control on cattle – now with resistance management options! VetGun is the easy-to-use, precision-dosage delivery system for controlling parasites on cattle, now with two insecticide options offering two different modes-of-action – for optimum horn fly resistance management.

AiM-L™ VetCaps (lambda-cyhalothrin) works with *AiM-A Abamectin™ VetCaps* for effective horn fly control. Their unique chemistries and modes-of-action deliver a 'one-two punch' for the treatment of profit-robbing parasites in your herd, while fitting perfectly into your insecticide resistance management program.

AIM-L stops LICE too.

AiM-L™ VetCaps can also be used to control biting and sucking lice in winter. The first dose will kill the adult lice and a second dose two weeks later will clean up any nymphs from newly hatched eggs.

Working smarter, not harder with VetGun.

- *Saves labor, time & money.*
- *Apply insecticide from a safe distance.*
- *No cattle confining or handling required.*
- *Time application for maximum parasite control.*
- *No chute or facilities required.*
- *Lower stress for you and your cattle.*

VetGun works with CO² and AiM VetCaps, sold separately.

THE PRECISION INSECTICIDE DELIVERY SYSTEM FOR CATTLE.

INTRODUCING AIM-A ABAMECTIN.™

THE ONE-TWO PUNCH TO COMBAT HORN FLY RESISTANCE.

VETGUN™ INTRODUCES A NEW TOOL IN THE BATTLE AGAINST HORN FLIES.

Use new AiM-A Abamectin™ in rotation with AiM-L™ to deliver a one-two punch – two different modes of action – for the treatment and control of horn flies.

VetGun is the easy-to-use, precision-dosage delivery system for treating parasites on cattle. It now features two unique chemistries – two different modes-of-action for optimum control and combatting horn fly resistance.

EFFECTIVE IN-SEASON ROTATION PROGRAM NEW AIM-A ABAMECTIN VETCAPS.

AiM-A VetCaps are 10 mL gelatin capsules containing abamectin (a macrocyclic lactone in the avermectin family), an Environmental Protection Agency (EPA)-registered insecticide for effective control of horn flies on beef cattle and non-lactating dairy cattle.

AiM-L VetCaps are 10 mL gelatin capsules containing lambda-cyhalothrin (a pyrethroid), an Environmental Protection Agency (EPA)-registered topical insecticide proven effective for control of horn flies and lice on beef cattle.

Both are available in 30ct and 150ct packages.

GET A ONE-TWO PUNCH ON HORN FLIES

The following is a sample rotation schedule of how AiM-L and AiM-A VetCaps could be used for control of horn flies and lice if the first treatment of the season is with ivermectin.

- Step 1:** Treat with AiM-L when flies start to appear
- Step 2:** Treat with AiM-A when flies approach approximately 200/animal
- Step 3:** Treat with AiM-L four weeks after AiM-A treatment
- Step 4:** Treat with AiM-A when flies approach approximately 200/animal

TO CONTROL LICE

During winter and early spring, treat with 2 x AiM-L, two weeks apart to control lice.

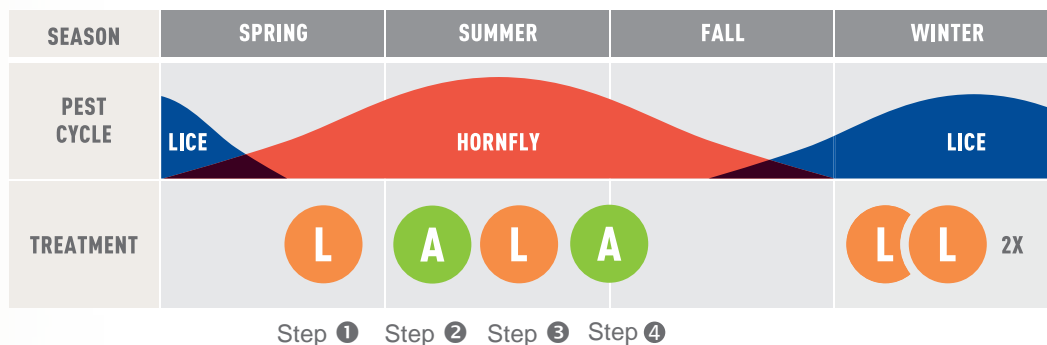

EFFECTIVE AND PROVEN CONTROL

The effectiveness of AiM-A against horn flies is proven. In an independent field trial, AiM-A VetCaps were applied to test cattle with significant horn fly burdens. AiM-A provided knock down and control of horn flies and remained 95% effective in control of flies through four weeks.¹

RESPONSIVE CUSTOMER SERVICE

Providing exceptional technical service and customer care is important to us. Contact Huvepharma to answer your questions and let us help with your product questions or support needs.
