### Product Comparison

#### Boost Arrival Confidence with DuraZyme Arrival +E

When it comes to the health and well-being of your beef and dairy cattle, we understand that different situations require different solutions. That's why we're excited to introduce the latest addition to our DuraZyme family, DuraZyme Arrival +E, a probiotic paste enriched with Vitamin E and Vitamin B12, specially formulated for gastrointestinal supplementation.

In the world of animal health products, DuraZyme has always stood for excellence, and Arrival +E continues that tradition. This innovative product is designed to address the unique challenges that cattle face during times of stress, including calving, climate changes, weaning, receiving, and shipping.

At its core, DuraZyme Arrival +E is a powerhouse of beneficial microorganisms. It's your go-to solution for maintaining appetite, digestion, and microbial balance in your herd. Here's how it sets itself apart from its family products:

**Probiotic Perfection:** DuraZyme Arrival +E is not just a probiotic paste; it's a probiotic powerhouse! Packed with selected host-specific lactic acid-producing bacteria, it provides your cattle with the essential probiotics they need for optimal digestive health. These beneficial microorganisms promote a balanced gut flora, ensuring your herd's well-being.

**Vitamins for Vitality:** What makes Arrival +E even more exceptional is its added nutritional value. It includes Vitamin E and Vitamin B12, two essential vitamins crucial for overall health and vitality. Vitamin E is known for its antioxidant properties, while Vitamin B12 supports energy metabolism. With Arrival +E, you're not just supporting digestive health; you're enhancing your cattle's overall resilience.

**Stress Relief in Critical Moments:** We understand that your cattle's health can be most vulnerable during critical times, especially on arrival. DuraZyme Arrival +E excels in scenarios where stress-induced diseases and infections are a concern, making it an indispensable choice for ensuring the well-being of your herd.

**Proven Efficacy:** Like its family members, DuraZyme Arrival +E is backed by solid research and producer trials. It has been rigorously tested and proven to deliver improved outcomes when compared to other, more expensive products. You can trust in the reliability and effectiveness of DuraZyme.

While our original DuraZyme Paste for Calves provides a general solution suitable for various conditions and environments, DuraZyme Arrival +E is your specialized partner in times of heightened stress. It's the product you turn to when you need targeted care for your beef and dairy, enhanced with the benefits of probiotics, Vitamin E, and Vitamin B12.

Boost Arrival Confidence with DuraZyme Arrival +E!
