

Activated Charcoal

GEL™

INDICATIONS:

Activated Charcoal Gel is a ready-to-use oral gel containing Bone Charcoal, and Attapulgit Clay with added electrolytes. Intended as an emergency first aid during times of accidental poisoning resulting from insecticides, herbicides, organic chemicals, intestinal bacterial contaminants, or grain overload.

APPROVED FOR USE ON:

Dogs and Cats

PRODUCT ADVANTAGES:

- Research has demonstrated that activated charcoal can effectively counteract the effects of certain oral toxins and accidental poisoning
- Convenient tubes ensure proper dosage
- Contains Bone Charcoal and Attapulgit Clay

DIRECTIONS FOR USE:

For use in dogs and cats. Select the recommended feeding rate in the tubes and feed the animal orally allowing time to swallow.

Dogs & Cats: 1-3 mL per kg (2.2 lb.) body weight. Repeat Activated Charcoal Gel feeding after 1 to 3 hours or as needed. A stomach tube should be used in animals unable to swallow. If conditions do not improve, consult your veterinarian. Depending on the condition of the animal, supportive therapy such as parental fluids and injectable antidotes should be used along with Activated Charcoal Gel for efficient recovery. May not be very effective in the treatment of heavy metal poisoning like lead, arsenic, mercury, etc.
