for all classes of poultry.

GUARANTEED ANALYSIS PER OUNCE:

Crude Protein (min).....	15.00%
Crude Fat (min).....	4.00%
Crude Fiber (max).....	14.00%
Calcium (min).....	13.00%

INGREDIENTS: Ahiflower® (*Buglossoides arvensis*) Seed Press Cake

The feed you provide for your poultry flock should provide a balanced and nutritious diet essential for maintaining your flock's health, activity, and productivity. Grit is a dietary supplement typically sourced from ground granite. Durvet's Smart Grit offers more than just an inert stone to aid the gizzard in breaking down certain dietary ingredients. Ahiflower® is an extremely hard and small seed known as a "stone seed" that is an all natural alternative to small granite rocks. Smart Grit also contains high amounts of naturally occurring calcium for laying hens and fiber for proper gut health.

FEEDING DIRECTIONS:

Provide free-choice access to the grit throughout the day. Place Smart Grit in an appropriate feeding container to maintain product integrity and quality. Smart Grit can also be scattered by hand in a designated feeding area. Daily consumption can vary based on your bird's diet, breed, age, growth stage, and production needs. Smart Grit particle sizes may vary to suit birds of different ages and physical proportions—larger beaks can handle bigger, coarser pieces.

Always ensure constant access to fresh water to support proper digestion.

STORAGE: Store Smart Grit in a dry place, free from rain, snow, and other moisture sources.

WARNING: Do not feed any product that is moldy, spoiled, rotten, insect-infested, or abnormal in appearance or odor.
